

BELVIDERE

VT-109 Culvert Project

The Vermont Agency of Transportation in conjunction with A.L. St. Onge Contractor, Inc. is set to begin the replacement of a failing culvert approximately 2 miles south of the VT Route 109 and VT Route 118 intersection. The completion date for this work is October 13, 2023.

This project will consist of removal of the failing 48" metal culvert, installation of a new precast concrete box culvert with headwalls, wingwalls, channel improvements and other incidental items.

St. Onge is anticipated to begin construction activities on Monday, August 14, 2023. This work will be performed during daytime hours 6:00 a.m. to 6:30 p.m. The actual installation of the pre-cast culvert will be installed during a 60-hour weekend road closure with an off-site signed detour.

We ask motorists to use extreme caution while traveling through the zone.

PUBLIC INFORMATION MEETING

WHEN: Wednesday, August 16, 2023 @ 6:30 p.m.

WHERE: Belvidere Town Hall - 3996 VT Route 109 Belvidere, VT 05442

The Vermont Agency of Transportation (VTrans) will be joining in at the Town of Belvidere Selectboard Meeting being held on Wednesday, August 16, 2023 to discuss this upcoming project.

VTrans will provide an overview of this project including the anticipated 60-hour weekend road closure with an off-site detour plan. After the presentation, VTrans will be open for any questions or concerns regarding this project.

SPECIAL NOTICE: Please email sbarrett@coibsinc.com, reference Belvidere Culvert, if you would like to receive weekly project updates via email.
